

Traction Release Notes

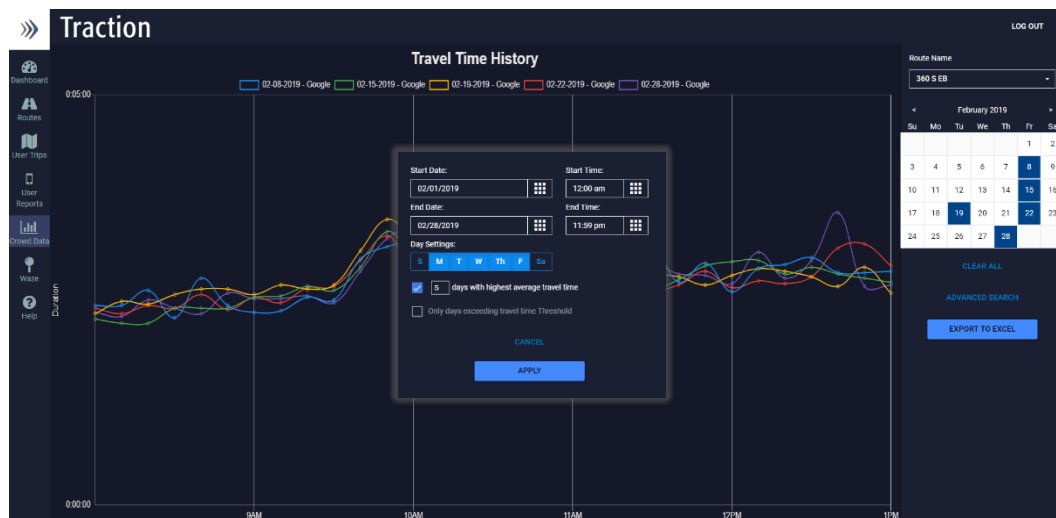

Updates and Enhancements

A Kimley-Horn Software Solution

MARCH 2019

- » (Website) Data source identification on crowd data graph and excel export.
- » (Website) Option to display route cross street names and locations on User Trip speed vs distance graph.
- » (Website) Advanced selection and searching for crowd data graph including days with highest travel times and days when crowd data threshold was exceeded.
- » (Website) Advanced searching functionality for Waze historical jams, alerts, and irregularities. Feature is accessible for agencies in the Waze Connected Citizen Program (CCP).
- » (Website) Threshold text and email alerts include data source, duration of time route travel time was over threshold, and the maximum travel time during the overage.
